

MUTOH

CORPORATE PROFILE

We Wish to Boost the Creativity of People and Companies

Human creativity is what helps daily life, industries and society evolve.

It is MUTOH' s mission to deliver products

and services that boost the creativity of people and companies.

We wish to contribute to the creation of new value from the unique perspective of MUTOH,

which has walked hand in hand with "manufacturing" professionals.

INSPIRATION

Turning inspiration into **excitement**

Vividly expressing the ideas of designers.

MUTOH broadens the excitement.

IDEA

Turning ideas into **reality**

We support "manufacturing" with IT.

MUTOH transforms inspiration to reality.

IMAGE

Turning images into **a common language**

Leading your passion for "manufacturing" to praise.

MUTOH conveys images into a common language.

Contributing to society by constantly innovating and continuing to challenge

Yasuhiko Isobe

President and Representative Director
MUTOH HOLDINGS CO., LTD.

MUTOH is a corporate group
that constantly creates new value and provides
“peace of mind” and “reliability”.

MUTOH possesses the DNA of “creativity” that is passed down to our drafters, CAD systems, pen plotters, inkjet printers and 3D printers.

MUTOH’s existential value is to contribute to society with “manufacturing Japanese quality” that has remained constant since the first design drafting machine called the “Drafter MH-1” that is registered as a Mechanical Engineering Heritage.

In the large format inkjet printer business, which is one of MUTOH’s main businesses, we have developed a variety of advanced technologies to meet the needs of the times, including unique smart printing technologies such as “DropMaster” technology. MUTOH’s products incorporating these proprietary technologies have received numerous awards, including the “Pinnacle Product Award” from the PRINTING United Alliance. MUTOH strives to create further added value in the field of digital printing, and meets the needs of our customers from production to sales and supply/maintenance services with the “One Stop” system.

In the 3D printer business that is expected to grow, we deliver surprises and excitement to many customers by providing knowhow accumulated by utilizing products unique to MUTOH, who knows all about “manufacturing” at our own manufacturing sites and products. MUTOH will continue to grow as one of the few comprehensive manufacturers that meet the needs of our customers with the “One Stop” system just like the large format inkjet printer business.

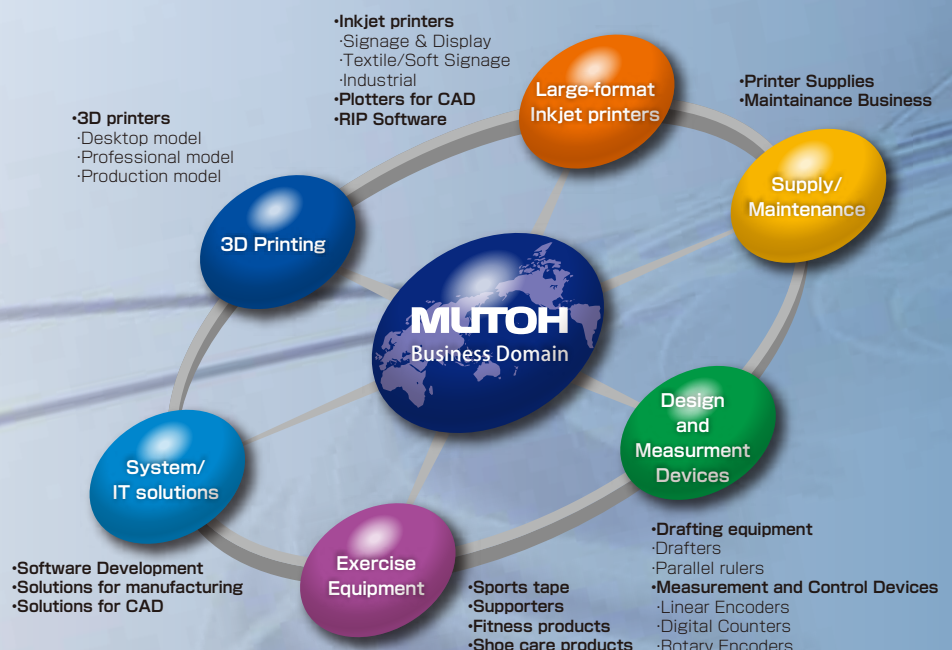

MUTOH will
boldly attempt
to create new value.

MUTOH will promote continuous structural reforms and strive to globally expand our existing businesses under the management philosophy of “complying with domestic and foreign laws and social ethics, keep in mind sensible corporate activities, improve the value of group businesses, permanently maintain and expand the MUTOH brand and strive for the sound development of society.”

MUTOH will strive to increase the added value of the digital printing business and contribute to creating new value from our own unique perspective such as the measurement/control equipment business, design and drafting equipment business and sports care business.

Please look forwards to “MUTOH”, a corporate group that constantly creates and provides new value, and we thank you for your continued support.

MUTOH provides
“the optimal
proposals and
best value”
to our customers.

Large Format Inkjet Printers

We meet the needs of “manufacturing” sites from signs and displays, textiles, industrial to CAD plotters.

MUTOH INDUSTRIES LTD.

Since producing Japan’s first large format inkjet printer for outdoor advertising, MUTOH has continued to provide technology and reliability that stays one step ahead. The advanced technologies include the three key building blocks "AccuFine," "i-screen," and "VerteLith," as well as the "UV-LED lamp local dimming control technology" that enables various texture expressions by controlling UV-LED lamp irradiation, and unique printing solutions that achieve natural and beautiful prints on various materials. With these technologies, MUTOH is involved in a wide range of manufacturing, not only in the traditional sign graphics field, but also in the textile and apparel field, and in the industrial field, from mock-up production to providing proofing solutions. MUTOH’s large format inkjet printers always respond to user needs and provide new value.

MUTOH PRINTING TECHNOLOGY

The three key building blocks enable high quality printing

UV LED lamp local dimming control technology

Multi-Purpose ink “MP31” produces beautiful prints on various materials

XpertJet

PRODUCT CERTIFIED FOR
LOW CHEMICAL EMISSIONS
UL GREENGUARD
UL 2818

Achieving high quality
and high productivity.

■ MUTOH INDUSTRIES LTD.

Signs and displays

Awareness towards higher productivity, drawing quality and environmental awareness continue to increase with signs and displays fields. MUTOH has lined up a new eco-solvent inkjet printer series "XpertJet Pro", which has inherited a platform designed to improve operability and reduce operational workload from "XpertJet" series. The adopted AccuFine print head delivers even higher image quality and higher productivity. The MUTOH genuine ink paired with the printers has been certified UL GREENGUARD Gold.

MUTOH provides high quality products that are safe and environmentally friendly, and meets the needs of the market.

Supporting a wide range
of business opportunities.

■ MUTOH INDUSTRIES LTD.

Textiles

Responsiveness to needs is essential for catching business opportunities.

The "ValueJet" Series for textiles realizes expansion to a wide range of textile businesses such as fashion, sports apparel and home fabrics with its media responsiveness.

The optimal printer and ink are provided for sublimation transfer printing and direct printing.

MUTOH will respond with quality and high cost performance.

■ MUTOH INDUSTRIES LTD.

Industrial

Printing onto various types of materials including metal, plastic, cardboard, glass and synthetic leather is required in the industrial market. Multipurpose ink that achieves natural and beautiful printing by utilizing the texture of the material and UV ink with excellent quick-drying and abrasion resistance support a wide range of applications such as commercial printing, package printing and industrial printing.

MUTOH widely expands fields of business.

Responding to higher-grade drawing generation.

■ MUTOH INDUSTRIES LTD.

CAD inkjet plotter

MUTOH's CAD inkjet plotter "DrafStation" Series creates high-quality drawings with graphics elements such as architectural perspective drawings, 3D CAD drawings and photographic image filling and supports design work that is vital for "manufacturing".

DrafStation®

Achieve easy-to-use high functionality
at a low price.

■ MUTOH INDUSTRIES LTD.

Cutting plotter

We maximize ease of use and functionality, such as Japan's first long-length segment cutting and continuous contour cutting.

The VC2-A1000 will improve work efficiency for apparel cutting.

3D Printers (Additive Manufacturing)

We respond to creative needs for "manufacturing," from hardware to solutions.

MUTOH INDUSTRIES LTD.

[Bi-Matrix] Structure

3D printers create three-dimensional objects from digital data. Today, 3D printers are not limited to being rationalized equipment from the design to prototype process, and are about to transform into a "production revolution tool" that will realize the ultimate high-mix low-volume production. At MUTOH, we offer a lineup of products in all areas from the desktop models that turn ideas into reality and the professional models that enable high-precision modeling to the high-end models that provide strong support for new styles of manufacturing. We have an overall product and service system in place for 3D printing, from hardware to solutions including various 3D printing services. MUTOH meets customer needs with "ONE STOP".

Turning ideas into reality. ■ MUTOH INDUSTRIES LTD.

Desktop models

Have you ever wanted to turn an idea that you came up with into reality immediately? MUTOH's fused deposition modeling (FDM) desktop models respond to the requests of industrial designers and artists.

The functionality and operability of MUTOH's desktop 3D printer models that support high-precision, high resolution, and engineering plastic output surpass the field of the "traditional desktop model". We offer full Japanese support for the software, manuals and customer support centers and deliver peace of mind and reliability as a domestic 3D printer.

[MF Series]

Faster and more beautiful. ■ MUTOH INDUSTRIES LTD.

Professional models

The biggest needs that we are requested from modeling professionals are the world's highest level printing speed and productivity. The full-color plaster type (3D Systems product), the DLP® photocurable resin type and meet various user needs.

We provide strong support for new styles of manufacturing. ■ MUTOH INDUSTRIES LTD.

High-end models

At MUTOH, we offer a lineup of large FDM type 3D printers that output super engineering plastics and achieve high-speed operation with a large-scale modeling with a maximum 500mm angle and AC servo motor that enable the modeling of the world's first "Bi-Matrix" structure.

MUTOH provides strong support for "new styles of manufacturing".

System/IT Solutions

Expanding the potential of the manufacturing industry with IT from software development to manufacturing/CAD solutions.

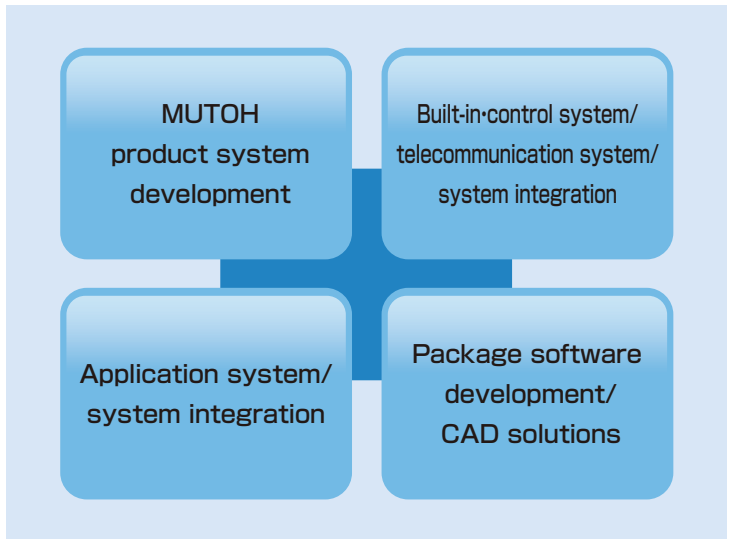

MUTOH INDUSTRIES LTD. ■ MUTOH ITEX Co., Ltd.

MUTOH's IT technology is utilized in familiar fields in our daily life such as solving management issues surrounding businesses and social infrastructure.

The provision of system proposals and software that utilize the knowhow cultivated through on-site support for "manufacturing" and MUTOH's knowhow that has created systems for design to manufacturing and information management is reflected in MUTOH's family of products as optimal systems from the customer's point of view.

MUTOH's system/IT solutions demonstrate great value as a source of competitiveness for MUTOH, which supports "manufacturing" companies.

Contributing to product manufacturing that prioritizes on-site needs. ■ MUTOH ITEX Co., Ltd.

Product system development

MUTOH has a history of supporting "manufacturing". The accumulation of knowhow over many years is utilized in MUTOH's unique manufacturing as control systems and application software of large format inkjet printers and 3D printers. MUTOH's system/IT solutions contribute as a driving force for manufacturing products that prioritize on-site needs with high development capabilities that has walked hand in hand with "manufacturing" as the backbone, and produce MUTOH's unique products that are praised by many customers around the world.

Development capabilities to meet customer needs. ■ MUTOH ITEX Co., Ltd.

Built-in/control system/telecommunication system/system integration

Digital devices that continue to increase in functionality, from business uses to personal uses.

MUTOH support the design and development of the system that is the heart of these devices.

MUTOH has garnered high acclaim for our functionality, rationality, and ease of use to meet needs by providing easy-to-use solutions and know-how cultivated over many years and various service systems with the latest technologies and high quality systems.

Proposing and constructing the optimal systems. ■ MUTOH ITEX Co., Ltd.

Application system/system integration

In addition to labor saving and rationalization of designs and manufacturing, diverse needs to realize and accelerate low-cost production such as data management of a large amount of CAD drawings, sharing of information between departments and the construction of production control systems that constitute the supply chain exist in "manufacturing" sites. At MUTOH, we stand from the field perspective for business system development and the development of web applications such as production/customer management and business processing, and lead to the construction of more reasonable and efficient business environments.

MUTOH meets a wide variety of on-site needs.

ProductionMaster™

Offering a more creative business environment. ■ MUTOH INDUSTRIES LTD.

CAD solutions

"Drafters" have completely changed design work. The spirit of work efficiency and designer's passion are utilized for MUTOH's CAD solutions as knowhow accumulated over many years.

The workability of the CAD packages from a drafter sense has been highly regarded as software that provides the optimal design environment for designers, and continue to support users with product development from 2D to 3D. MUTOH's CAD packages can be expected to shorten the introduction period at a low cost. In addition, they have excellent operability and contribute to the streamlining of design work.

MUTOH contributes to building a design environment with high cost performance.

M Draft suite

M Draft Spirit

Supply/Maintenance

We respond to a wide variety of user needs and back up quick responses with the comprehensive strength of the group.

■ MUTOH INDUSTRIES LTD.

User needs are diverse depending on different situations and applications, such as large format inkjet printer ink and FDM type 3D printer filaments.

The supply products offered by MUTOH provide the optimal genuine ink for MUTOH's large format inkjet printers such as support for large-capacity ink packs that improve work efficiency, solvent-based/printing pigments and sublimation transfer ink with excellent color expression and environmental performance and multipurpose ink and UV ink that can be printed on various materials.

For the 3D printer filaments, we provide MUTOH's original supplies by application from general resin materials to support materials that do not require industrial waste treatment and professional specification engineering plastic materials. Unexpected trouble that should never occur sometimes causes great financial loss. The speedy supply of supplies, regular maintenance, and prompt maintenance in the unlikely event of a problem are essential. MUTOH's maintenance services prevent such unforeseen circumstances.

MUTOH supports users by providing supplies that maximize high cost performance and machine performance and with a trusted and reliable backup system.

Cartridge type

Large capacity ink packs

Measurement Control Equipment

Linear encoders, digital counters and rotary encoders back up measurement and control needs with high accuracy.

■ MUTOH INDUSTRIES LTD.

The "Digicollar Series" meets the needs of measurement and processing control of industrial machinery and equipment such as production equipment and measuring equipment.

We offer a diverse lineup from detection to display and control including rotary encoders, original wire type linear encoders and high-resolution linear scales.

MUTOH supports production automation and labor saving with the extremely high precision, high functionality, and high efficiency "Digicollar" Series.

DIGICOLLAR®

MUTOH
Business Domain

Design Drafting Equipment

MUTOH's drafters are top of the line for manual drafting equipment. We provide strong backup for design work that is responsive to the ideas of designers.

■ MUTOH INDUSTRIES LTD.

Drafters and parallel rulers act as the arms, hands, and fingers of the designers, allowing them to draw exactly as intended. With the spread of CAD systems, drafters and parallel rulers nearly disappeared from the design field, but their value has been reviewed in recent years as tools to cultivate the sensibility and basic skills of designers. MUTOH supports all designers who are particular about their drawings, and value their own sensibility and inspiration.

MUTOH
Business Domain

Sports Care

Protect and strengthen your body, and prevent injury in order to bring out your athletic ability.

■ MUTOH ENTERPRISES LTD.

A healthy and pleasant life starts from understanding your body, and taking care of it daily. MUTOH is a professional in comprehending the body scientifically. We have been leading the sports scene with revolutionary products such as tapes, supporters, insoles and fitness goods. We introduced sporting tapes at a time when Japan was still not familiar with them. MUTOH has walked hand in hand with sporting tapes, which are now essential in sports. There are various types of sporting tapes, insoles and fitness goods that we provide through our original brand "Finoa", including Japan's only color tapes that are officially licensed by the Japanese national soccer team and the core-training item "Shape Ring", which is a collaborated item with professional athlete trainers. We are also the only company in Japan to sell supporters from "PRO Orthopedic Devices Inc.", which have been widely used by top athletes in the NFL, MLB, and the NBA for over 50 years in the United States, a sports powerhouse. MUTOH's sport support products have received high praise in the market. MUTOH's reliable sports care products are created with the latest science, and support a "healthy and pleasant life".

The MUTOH brand expands globally with technology and products from Japan.

Development attitude based on a "bottom-up approach to management". The MUTOH brand responds to your needs with our unique technology.

MUTOH promotes product development with a "bottom-up approach to management" from the user's point of view. MUTOH's unique technological strength, such as "Smart Printing Technology" represented by the inkjet technology "DropMaster," has been highly evaluated by many customers around the world. This technology has also been passed on to the development of 3D printers.

High quality and reliable "Made in Japan" .

"Made in Japan" is synonymous with quality and reliability. MUTOH promotes production activities that support different needs in each region of the world. MUTOH's products are "Made in Japan" and provided to the world through a global network.

Earth friendly and involved with the community. MUTOH “contributes to society and is environmentally conscious”.

MS41 Eco Solvent Inks

Townscapes before the earthquake reproduced with 3D printers. Supporting the “recovery of the heart” and “reconstruction of towns”.

MUTOH supports the production of three-dimensional model for the “production of a restored three-dimensional model of the coastal area of Ishinomaki City using 3D printers” project as part of the Support for Recovery from the Great East Japan Earthquake.

Achieving both improved productivity and kindness to water resources. MUTOH’s printers contribute to an environmental pollution-less society.

Processed wastewater treatment of dyeing work and waste of ink are perpetual issues. MUTOH proposes the “next-generation dyeing work” that aims towards minimal ink use and minimal water use after printing.

Printing landscape photos onto the construction sheets of Suwa Taisha Shrine. Developing activities rooted in the community.

During the restoration work of Suwa Taisha Shrine, MUTOH printed landscape photos of the shrine grounds before the renovations onto construction sheets. We aim to be a company rooted in the community, mainly in Shimosuwa, Nagano Prefecture, where the main factory is located.

Providing environmentally friendly ink. Our policy is to be eco-friendly in every process.

MUTOH provides high quality products that are safe and environmentally friendly to customers with our product development process.
